PODIS[®] Plus

Take the guesswork out of purchasing PODIS Plus helps with future forecasting and procurement capability

Our powerful inventory management system PODIS Plus provides your staff with the tools they need to simplify your workflow and manage your entire inventory.

Using the insights of previous ordering data, PODIS eliminates guesswork with intelligent inventory calculations that anticipate ordering needs. By comparing upcoming drug needs with your current stock, PODIS suggests orders that lead to minimal waste while adding appropriately to current inventory.

PODIS allows your staff to:

- Use reports to master revenue cycle management
- Provide insights to track payments on a dose and patient level
- Use predictive analytics to determine ideal timing for reorders
- Reduce carrying costs

With PODIS, inventory management is easier. The reports and analysis give visibility into the big picture while staff compliance becomes effortless and data-driven.

Take the stress of purchasing off your plate with PODIS, leaving you more time to focus on what really matters: providing patients with the best in-clinic experience possible.

What's new in PODIS Plus

Recent updates and enhancements

We're constantly enhancing PODIS and adding new features to streamline workflows help users get the information they need every day. These are just a few of the recent changes:

- You can now customize the home page dashboard to show the information you need at your fingertips
- Easier ordering: order straight from the inventory forecast report
- Better handling of manufacturers' 2D barcodes

Plus a full pipeline of new features coming in 2024!
